

GAVEN

VOTE FOR HOUSEHOLD SOLAR

Queensland has 300 sunny days a year. If more people had rooftop solar, it would ease the burden on struggling households and **bring energy bills down**. But the LNP has no plan to help more households go solar, and is pulling the plug on the renewable energy target.¹

That's bad for Queensland families, and does nothing to support jobs in the local solar industry.

To vote for solar, VOTE AGAINST THE LNP

Here's how:

THE GREENS

Why these candidates?

To determine who appears on this how to vote card, parties and candidates were researched and surveyed for their position on 26 policy areas. These are the candidates who won't scrap the renewable energy target. For more information and the full results of the survey go to: getup.org.au/qld-votes

Remember to number every box to make your vote count.
